

NATIVE PROJECT BUILD

CDFY

Done-For-You Affiliate Infrastructure

A darker, more premium affiliate-funnel build that turns a loose DFY concept into a cleaner business system with offer structure, monetization flow, and conversion-aware sequencing.

Readable social-post format

Built from real project media

Exported as PNG and PDF

01 System Build

Landing page, checkout handoff, upsell, downsell, and offer wall logic in one review funnel.

02 Why It Matters

Makes the business feel packaged, premium, and easier to monetize than a thin affiliate page.

03 Audience

Affiliate buyers, marketers, review-page visitors, and people

What this asset is for

A stronger one-page social/promo overview built from the project's own visuals and positioning instead of a generic template.

Best use cases

- social teaser post
- client/shareholder overview
- launch or JV support asset

looking for a cleaner online business stack.

- internal offer snapshot

Content basis

04 Expansion

Swap placeholders for live offers, inject tracking, proof, and stronger CTA/testing loops.

Drawn from each project's current design direction, on-page offer language, and available local art files inside the repo.
